

Responsive Portfolio Website

Project Name: Responsive Portfolio Website

Student Name: S Darshan

Internship Name : Frontend Developer Internship

Objective :

The objective of this project is to design and develop a modern, responsive, and user-friendly personal portfolio website using front-end web technologies. The website serves as a digital portfolio to showcase personal information, technical skills, educational background, projects, and contact details in a professional manner.

The project focuses on creating an attractive user interface that provides a seamless user experience across desktops, tablets, and mobile devices. It also demonstrates practical knowledge of responsive web design, clean code structure, and modern web development practices. The portfolio can be used as an online resume to present professional achievements and projects to recruiters, internship providers, and potential employers.

Technologies Used:

- Visual Studio Code (VS Code)
- Figma
- HTML5
- CSS3
- Bootstrap 5

Project Features:

- Modern and professional portfolio design
- Fully responsive layout for desktop, tablet, and mobile devices
- Attractive Home/Hero section
- About Me section
- Skills section with technology icons
- Education section
- Projects showcase section
- Contact section
- Smooth scrolling navigation
- Responsive navigation bar
- Bootstrap components for better responsiveness
- Clean typography and modern color scheme
- Optimized layout for better user experience

Folder Structure :

Responsive-Portfolio/

```
|
|├── index.html
|├── images/
|   ├── profile.png
|   ├── mycv.pdf
|   └── e-commerce-dashboard /
└── task-manager /
```

How to Run the Project :

1. Download or clone the project from the GitHub repository.
2. Extract the project folder if it is downloaded as a ZIP file.
3. Open the project folder using Visual Studio Code.
4. Open the **index.html** file in any modern web browser such as Google Chrome, Microsoft Edge, Mozilla Firefox, or Brave.
5. Alternatively, use the **Live Server** extension in Visual Studio Code for a better development experience.
6. The portfolio website will load and can be viewed on both desktop and mobile devices.

Project Screenshots: 1) Home Page

Displays the landing page of the portfolio with the navigation bar, introduction, profile section, and call-to-action buttons. It provides visitors with a professional first impression.

2) Service Page:

It tells about the services which I provide to the clients, it describes about the each skill.

3) About Section :

Introduces personal information, educational background, career objective, and a brief overview of professional interests. Here a new feature is added where we can download the CV.

4) Skills Section:

Highlights technical skills, programming languages, web technologies, and development tools using an organized and visually appealing layout.

5) Projects Section:

Showcases completed projects with project descriptions, technologies used, and project links, demonstrating practical development experience.

6) Contact Section:

The screenshot shows the 'Contact me' section of a website. At the top, there is a navigation bar with the logo 'PortFolio' in orange, and links for 'Home', 'Services', 'About me', 'Skills', 'Portfolio', and 'Contact me'. A 'Hire Me' button is also present. Below the navigation bar, the section is titled 'Contact me' with the subtitle 'Cultivating Connections: Reach Out And Connect With Me'. The main content area contains a contact form with the following fields: 'Name', 'Email', 'Phone Number', 'Service Of Interest' (a dropdown menu), 'Timeline', and 'Project Details...'. A 'Send' button is located at the bottom right of the form.

Provides contact details and social media links, allowing recruiters and visitors to connect easily.

Conclusion:

The Responsive Portfolio Website was successfully designed and developed as part of the Frontend Developer Internship. The project demonstrates the effective use of HTML5, CSS3, Bootstrap, Figma, and Visual Studio Code to build a modern, responsive, and visually appealing portfolio website.

Throughout the development process, emphasis was placed on responsive design, clean code organization, and user-friendly navigation to ensure compatibility across different devices and screen sizes. This project strengthened practical knowledge of front-end development, responsive web design, and website deployment using GitHub Pages.

Overall, the project serves as a professional online portfolio that showcases technical skills, educational background, and projects while reflecting modern web development best practices.
